## KENT Alkaline Water Filter Pitcher

KENT Alkaline Water Filter Pitcher, to provide you and your family with safe, clean and germ-free water with the right pH levels.

### pH Scale

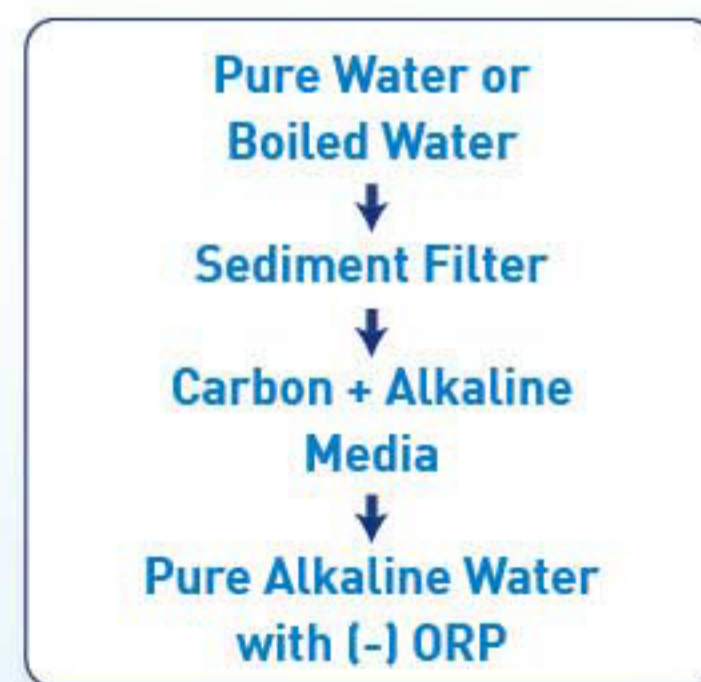

pH levels indicate, whether the water is acidic or basic. A pH of 7 is neutral. Battery acid is an example of a pH- 0 and drain cleaner would be a pH - 14.

Water with a well-balanced pH level is a necessity. Being either too alkaline or too acidic can be detrimental to health. Low pH or acidity will lead to weight gain, slower immune response, and susceptibility to diseases, while a water too alkaline will lead to inability to metabolise key nutrients.

It's important for us to drink water with the right pH for a healthy body and mind. KENT Alkaline Water Filter Pitcher not only ensures the right pH levels in the water, but it also removes chemical and physical impurities, thus giving pure water with the right pH levels for a healthy lifestyle.

### Filteration Process

## Features

## Specifications

Model Name	<b>KENT Alkaline Water Filter Pitcher</b>
Model Number	11054
Body Material	Food-grade Plastic (Jug: PC)
Product Dimensions (mm)	300 (L) X 115 (W) X 255 (H)
Filter Materials	Sediment-Carbon-Alkaline Media
MRP (Inclusive of all taxes)	₹1950/-
